Please Note: These scroll controls an the QBox must be rebooted for these	e connected directly to the QBox and changes to take effect.

4. Change 'Multiplier' value from **127** to **70** and press 'OK' button.

Scroll Config	Buttons (Multi-Button	2
	<u>M</u> ultiplier:	122
		<u>Linear</u>
		Centre Stop Mode
	Stop Point:	7
	Stop Zone:	0

5. You will see this message 'You must reboot this QBox for the new settings to take effect' press OK button.

6. Again in 'QBox Status Panel' do the right-click of mouse on the QBox and select option 'Reboot QBox'.

Description	Status	Status	
	Master		
		View Output Info	
		Reconnect	
		Show System Info Panel	
		Hide System Info Panel	
		Disable	
Host Control	onnect Overlag	Modify	
		Delete	
		Set As Master	
		Device Settings	
		Reboot QBox	

After those steps your Multibutton Controller will scroll slower.
