QStart Mac Setup

QStart Mac is distributed as a DMG (*.dmg) file via e-mail, CD or USB stick.
If you have the QStart USB stick, insert the stick into your Mac and
navigate to the QStart for Mac folder, run the .dmg file and agree to the license.

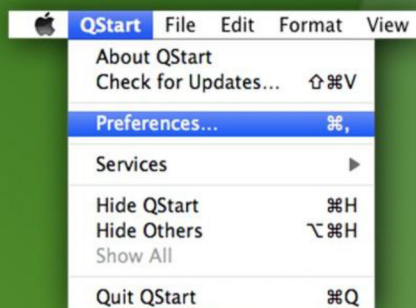

Software USB stick

Click and drag the QStart icon into the applications folder to install.

Now inside the Applications folder you can find the QStart icon shown above.
Double-click the icon to start using your QStart Mac.

To use the full version of your QStart Mac, you must first register the software.
To register your QStart you will need to ensure you have internet connectivity.
Navigate to the QStart button on your menu at the top of the screen, from there
click the preferences button and onto registration. You will need to fill out all fields
and enter your serial number, then click Register.

Your QStart Mac Serial Number:

For instructions on how to use your QStart software, consult your Quick Start guide
in User Guides on the install menu or navigate to QStart for Mac on your USB stick
and open the Guides folder. Open 'QStart Mac Guide' or 'QStart Mac UserGuide'
for full instructions.
