QStart Software Release Notes

Software Release Overview:

Product: QStart

Version: 1.5

Build: 2155

Date: 3rd October 2018

Software Release Details:

QStart Build 2155

- Added support for docx files import
- The Markers Edit Window was not working due to a failed registration of a file.

QStart Build 2153

- Added an option to loop the prompting. This can be enabled in the Options page.
- Fixed and issue where the Markers window doesn't appear when invoked using the + sign.

QStart v15 Build 2151

- Simplified the registration process so that no Product code is required. This means that QStart is effectively free of charge provided the user registers his copy.
- QStart now uses a simplified new installer.
- QStart now supports the NewTek NDI.
